

# Site C Portage Program Portage Checklist

---

This Portage Checklist (the “**Checklist**”) is designed to assist you, the Vessel Operator, in properly preparing and securing the Vessel for overland transportation. You must make every effort to prepare the Vessel according to the Checklist, as it applies to your Vessel. BC Hydro will not be responsible for damage due to improper preparation, loading and/or securing by the Operator, or for faulty or defective chains, binders, or other equipment provided by the Operator to secure the Vessel.

Please take the time to read this information and confirm you have completed the requested actions prior to departure from the Departing Boat Launch by signing and dating at the end.

- Secure all external hatches, lids, cockpits, valves, etc.
- Remove all ropes, strapping, cloth and canvas, etc.
- Remove or securely stow all external equipment, radios, electronics, horns, lights, etc.
- Remove or secure all other loose items on board
- Remove all items extending past the stated length and width of your vessel
- Confirm all straps are properly applied and secured

I have read the above and confirm that I have completed all of the requested actions that are applicable to my Vessel.
