

SITE C CLEAN ENERGY PROJECT

JOB OPPORTUNITIES WITH SITE C

Since construction started in July 2015, Site C has been creating a lot of jobs for British Columbians. In the coming months and years, many more jobs will be created as main civil works construction activities increase and as major contracts get underway for turbines and generators, transmission works, and the generating station and spillways.

Site C is one of the largest infrastructure projects in Canada. It opens doors for workers in the community, the region and across the province.

For more information on job opportunities, including training and apprenticeships, visit the [jobs page](#) on the Site C website.

Types of work

Workers at all skill levels will be required. Types of construction jobs needed for the Site C project include:

- Boilermakers
- Carpenters (industrial and formworkers)
- Cement mason / concrete finishers
- Construction supervisors and forepersons
- Crane operators
- Culinary workers and kitchen personnel
- Drillers and blasters
- Electricians (instrumentation, industrial and winders)
- Foresters
- Heavy duty mechanics
- Heavy equipment operators (backhoe, skidsteer, dozer, excavator, grader, shovel, feller/buncher, loader and zoom boom operators)
- HVAC technicians
- Instrumentation and control technicians
- Insulators
- Ironworkers (reinforcing and structural)
- Millwrights (industrial mechanics)
- Painters
- Pile drivers
- Pipefitters
- Plumbers
- Scaffolders
- Security guard staff
- Sheet metal workers
- Surveyors
- Truck drivers
- Underground tunnellers

Working on the Site C project

The vast majority of hiring for the project will be done by the companies awarded contracts to build Site C. Workers are encouraged to apply directly to those companies awarded contracts to build the project, as BC Hydro will not be accepting resumes on behalf of those companies.

BC Hydro is facilitating the hiring process by listing the successful companies and their contact information on the 'How to Apply' page of the project website at www.sitecproject.com. Job opportunities with the Site C project are also posted on the [WorkBC](#) and the [Employment Connections](#) websites.

The worker accommodation lodge for Site C has been designed to attract and retain approximately 1,600 workers.

The lodge is a custom-designed, three-

story hotel-like lodging, featuring single bedrooms with a private bathroom, a flat screen TV and free Wi Fi. The lodge has amenities such as a movie theatre, a gymnasium with a running track and weight-training area, a multi-faith centre and a licensed lounge.

Jobs for British Columbia

BC Hydro's priority is to ensure that British Columbians are first in line to work on the Site C project.

We promote local hiring by working with regional employment agencies, funding skills training programs in the region and have planned and participated in local and regional job fairs. In addition, BC Hydro is working with construction contractors to facilitate local and Indigenous hiring. For more detail on monthly employment statistics, visit: www.sitecproject.com/document-library/monthly-employment-statistics.

Apprentices and training

BC Hydro has invested in a number of skills and trades training programs in the region for local and Indigenous students to assist with skills and trades training required for the Site C project.

Site C is creating valuable training and apprenticeship opportunities for young workers and persons new to the trades. It is estimated that about half of Site C's anticipated workforce will consist of apprenticeable trades. BC Hydro has included apprentice targets in several contracts, including the main civil works, generating station and spillways civil works, the transmission lines and substation contracts.
